Live-Release Rate

CCAS prides itself on its mission of saving the lives of the animals in our community. As an Open-Admission shelter that is charged with taking in the many animals that come through our doors, usually whether we have the space for them or not, we are challenged every day with finding ways to accomplish our mission and work towards our vision of a no-kill community. We are delighted to see our accomplishments reflected in our Live-Release Rate, a number we calculate to measure our annual progress in saving animals — it is the percentage of animals that leave our shelter alive. So far in 2013, our Live-Release Rate for cats is 67%, up an amazing 13% from the same period in 2012. For dogs, it is an extraordinary 87.4%, up 10.9% from 2012!

We are able to achieve these successes through programs such as:

- Low-cost spay and neuter surgeries for the public, preventing countless numbers of unwanted litters
- Our reclaim and Shelter Partnering programs, which work to find families of lost animals and broadens the scope of potential homes for unwanted animals, and
- Our Foster Program, which expands the shelter's capacity to care for animals that are too young to be sheltered or have special needs — animals that otherwise, may not have had a chance.

The numbers prove we are achieving our goal, although there is still more work to be done. Through the implementation of our programs and the generous help from our community, volunteers, friends and supporters, we are confident we can achieve even greater things in the future.

Sway

Sway lost his way and needed help finding a home to call his own. When he got to the shelter he tested positive for FIV (Feline Immunodeficiency Virus.) Unfortunately there is a stigma attached to this condition so cats like Sway are at a disadvantage when potential adopters are looking for a new kitty, especially during a busy kitten season.

The staff at CCAS knew that Sway deserved just as much of a shot at the good life as any other cat or kitten at the shelter so they worked even harder to find Sway a home.

In early August, a family came in looking for their newest family addition. Colleen, from

the CCAS staff introduced them to Sway. She told them about how sweet Sway was and how he's always giving out kisses!

The family was nervous when Colleen explained that Sway was FIV positive, but she explained the condition in great detail and assured them that Sway could still live a normal cat life...he just needed someone to give him that chance! It didn't take long before they were convinced that Sway was the perfect cat for their family.

Sway now spends his days giving lots of kisses to his new family.

THE CAMDEN COUNTY ANIMAL SHELTER IS PLEASED TO INTRODUCE VICKI ROWLAND AS OUR NEW EXECUTIVE DIRECTOR

Vicki has always had a passion for animals and has dedicated the last six years to saving lives at the Peninsula SPCA in Newport News, VA. As Director of Marketing and Programs Vicki has shown that hard work and determination can achieve fantastic results. Vicki has a Master of Arts in Education and Human Development degree from George Washington University which concentrated on human resource development and leadership. CCAS is excited about Vicki coming on board and we know that the future holds infinite possibilities for the needy companion animals of our County.

What is the In-Shelter Clinic?

Camden County Animal Shelter offers a low-cost spay/neuter and vaccine clinic in addition to its other services. Spay/neuter surgery takes place on Tuesdays, Thursdays, and Fridays in our shelter by a licensed veterinarian and an appointment is required. Simply call us at 856-401-1300 to make your appointment today.

Jazmine

Jazmine here, writing all of you on how I am doing with my new parents.

Seems like my new mom is pretty strict, but very loving. Dad's the pushover — walks, ball-chasing, numerous treats (the healthy kind), feeds me 3 times a day, gives me plenty of toys to play with and seems to enjoy playing with me. I'm allowed on his big chair and I usually nap under the dining room table...life is good!

Thanks to all of you for finding me a home with grandkids that come over and seem to love me lots. I'll be having sleepovers with the two granddaughters when I get a little older.

I just completed puppy training at PetSmart and graduated on June 18th! My dad had his hands full with me for a couple sessions, but all turned out well. I'm also enjoying Doggie Day Care once a week, meet new friends, and play hard with some of my regular friends.

I'm 35 pounds and I'm all finished with the Vet until checkup time next year. Hope you all have a wonderful summer!

Sincerely with love,
Jazmine

Coco came to us when her family could no longer care for her due to health issues.

When she first came in, the staff quickly realized that she had a major uterine infection which was caused by a partial birth and subsequent obstruction. She was in a lot of pain and was suffering so we had to act fast.

Coco was immediately scheduled for emergency surgery and went into foster care with our vet tech Krystal. After a long road to recovery which included many follow-up treatments and a lot of TLC,

Coco was finally placed up for adoption.

Within two weeks of being back in the shelter Coco found her new home. Linda had recently lost her dog and was unsure if she was ready to adopt again but had stopped by the shelter to take a look. Luckily for Coco, Linda immediately saw what a wonderful dog she was and fell in love! Linda still keeps in touch with us to let us know how well she is doing.

Coco now lives on an acre of property and

her favorite way to pass the time is chasing the wild turkeys around the backyard.

Coco
